FCC Statement

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and the receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult a service representative for help.
Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. LifeWorks is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void
the user's authority to operate the equipment.

Mouse Devices: Health Warning

Use of a mouse may be linked to serious injuries or disorders. As in many activities, when using a computer you may experience occasional discomfort in various parts of your body. However, do not ignore symptoms such as persistent or recurring discomfort, pain, throbbing, aching, tingling, numbness, burning sensation or stiffness. Promptly see a qualified doctor, even if symptoms occur when you are not working at your computer.

There is general consensus among researchers that there may be many factors linked to the occurrence of these symptoms, including overall health, stress, physical condition and how a person positions and uses his or her body during work and other activities (including the use of a keyboard or mouse). The amount of time a person spends performing an activity may also be a factor.

If you have questions about how your own lifestyle, activities or physical condition may be related to these symptoms, see a qualified health professional.
Battery-Powered Devices
Use of rechargeable or disposable batteries in an improper manner may result in battery fluid leakage, overheating or explosion. Battery fluid is corrosive, may be toxic, can cause skin and eye burns, and is harmful if swallowed.
Radio Frequency Technical Specifications: 2.4 GHz Devices Non-specific short range device. RF output power meets all SRD requirements.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

   receiver to computer

3. turn mouse on
   (underneath)

ON OFF

4. start using your mouse!

troubleshooting

situation	try this
mouse does not work	• Ensure that the mouse is turned on.
	• Ensure the USB nano receiver is connected to your computer. If it is, try connecting it to a different USB port.
	• Ensure that the batteries are charged and inserted correctly.
	• Ensure that the sensor on the bottom of the mouse is clean.
	• Restart your computer.
